Group Discussion: IMSH Topics	Sarah W. Kathy R. Margie H.	<ul style="list-style-type: none"> • Sarah and Kathy shared what they learned at the IMSH Conference related to the use of the TeamSTEPPS tool in IPE. • A handout was shared with the group on Concepts and Tools used in IPE to include ISBAR, Brief/Huddle/Debrief, Cross Monitoring, and CUS. A script for initial scenario planning was also given out. • Sarah shared information related to new graduate nurses and the fear they have about simulation. Sarah stated that the pre-brief is so important to help welcome new staff to the simulation center. • Kathy shared handouts received from the IMSH conference related to becoming an SSH Fellow. • Kathy shared handouts received from the conference related using the DeBrief Tool for novice De-briefers. The tool offers a step by step guideline on how to debrief successfully after simulation. • Margie shared that 3 staff members from SLU attended IMSH. SLU is working on implementing an “Escape Room” concept into their simulation center. The new process will involve sophomore students and senior students. The process will help students to better understand the nursing process. It can also be used with IPE. Their goal is to have this implemented in the fall of 2019.
	Guest Speaker: AVKIN – Wearable Technology for Patient- Centered-Simulation	<ul style="list-style-type: none"> • Amy and Megan from AVKIN gave a demonstration using the tracheostomy and sleeve wearable task trainers. The male/female wearable task trainers were also displayed for viewing. Amy explained how the tasks trainers function. They run on a lithium battery and there are devices that notify the SP when to react if a skill is being done incorrectly. The task trainers also have lung and heart sounds. The task trainers can be controlled with an iPhone or Android device. The product price ranges are \$5,000 to \$10,000 depending on the need of the facility.
